HIG-3 Akshay Park Gokul Road, Hubli, Karnataka, India, 580030, IN

I'm a passionate and self-driven tech enthusiast currently pursuing a BCA degree, with strong interests in website development, AI tools, and creative digital content. My journey combines technical expertise with creative vision, allowing me to build comprehensive solutions from concept to deployment. I am beginner level experience in building web and mobile applications using modern technologies like React, Node.js, TypeScript, and the complete MERN stack. Beyond traditional development, I've explored automation, Blender animation, and text-to-video tools, giving me a unique multidisciplinary perspective. My creative side shines through designing templates, banners, and hyperrealistic product advertisements. I thrive on learning new technologies, building tools from scratch, and taking on projects that span from app development to video production.

Projects

WRITING APP

Developed a comprehensive writing platform that connects writers and readers through personalized content discovery. This full-stack application demonstrates my ability to handle both frontend user experience and backend API development.

- Custom RESTful API for content management
- User authentication and profile management
- Story categorization by style and genre
- Interactive reading and writing interface
- Real-time content filtering and recommendations

SKILL2CAREER NLP PLATFORM

Skill2Career represents my venture into AI-driven career analytics, showcasing advanced Natural Language Processing capabilities combined with practical career guidance applications.

- Profile Analysis->Advanced NLP algorithms extract and analyze skills, experience, education, and achievements from LinkedIn profiles with high accuracy.
- Career Matching->AI-driven algorithms match extracted data with industry career trajectories, identifying optimal career paths based on individual profiles.
- Actionable Insights->Transform unstructured LinkedIn data into concrete career recommendations, helping users make informed decisions about their professional future.

MIND MAP AI

Ultimate Productivity & Knowledge Tool. This project demonstrates my ability to identify real-world problems and create AI-enhanced solutions that improve daily productivity workflows.

- AI-powered idea organization and retrieval
- Intelligent content categorization
- Cross-platform synchronization
- Smart recommendation engine for related concepts

Core Skills

AI & Emerging Tech: prompt engineering, Natural Language Processing, AI tool integration, Machine learning fundamentals

Tools & Platforms: Git/GitHub, VirtualBox with Kali Linux, RESTful API Development, Database design and management

Creative Tools: Filmora, Clipchamp, Flixier, Canva/Figma, Blender animation, Content creation and storytelling

Programming & Development(Basics): C++, JavaScript, MERN Stack, MongoDB, Express, React, Node.js, TypeScript

FULL-STACK VERSATILITY, CREATIVE PROBLEM SOLVER, AI-FORWARD MINDSET

Education

ST Anthony Public School

10th Grade Schooling

GPA: 66%

Avanti Integrated with MIPU (Mangalore Independent PU College)

11th & 12th Grade Science

GPA: 76.16%

BVB College(KLE Tech)

2023 - Present

Bachelor of Computer Applications (BCA) Computer Science

GPA: 7.12

Languages

English, Kannada, Hindi

Interests

website development, AI tools, creative digital content, automation, Blender animation, text-to-video tools, designing templates, banners, hyperrealistic product advertisements, AI & NLP Projects, App & Game Development, Entrepreneurship & Digital Creativity
